RUTGERS/AL QUDS BRAIN RESEARCH EXCHANGE & PALESTINIAN NEUROSCIENCES INSTITUTE

Mark A. Gluck (Harvard '81), a Professor of Neuroscience at Rutgers University, in Newark, New Jersey, has established a U.S.-Palestinian brain research and education exchange between Rutgers University and Al-Quds University (located outside Jerusalem in the West Bank), leading toward establishment of a Palestinian Neurosciences Institute at Al-Quds, and the creation of a Palestinian Neurosciences Society to represent Palestinian research and healthcare interests at international societies and conferences. The Rutgers/Al-Quds Brain Research Exchange will support:

1. Brain research in West Bank conducted by Al-Quds University students and staff
2. Bringing Palestinian students and doctors from Al-Quds to Rutgers for training
3. Sending Palestinian students and doctors to international conferences
4. Sending Rutgers students and faculty to Al-Quds for collaborative research
5. Public health education programs in the West Bank on brain disorders and mental health.

FOR MORE INFORMATION ON THE PROGRAM, GOALS, AND HOW TO MAKE A DONATION (via check or online with a credit card), VISIT THEIR WEB SITE AT: http://www.alquds.rutgers.edu
